Review of ship activity around Indian ports

Port activity and vessel numbers at key Indian ports increased across the board this week. There are more crude oil, product and LPG tankers in various key locations.

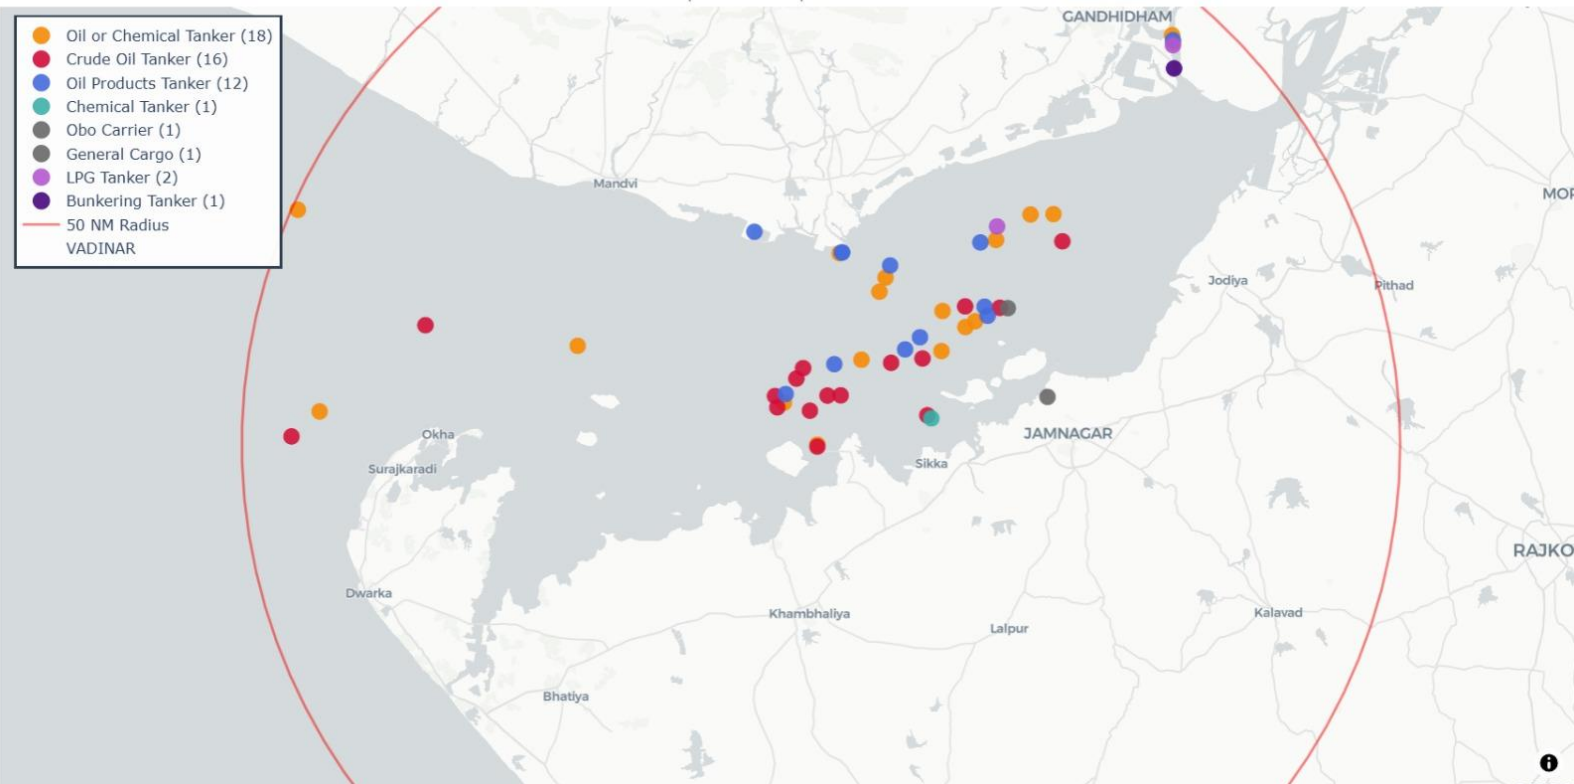

Please see below a comparison of vessels at time of publication and a week ago.

Vadinar 27 November 2025

There are 52 ships in the vicinity of Vadinar, 12 more than a week ago. Oil/chemical tankers increased most, 50% up at 18

Paradip 27 November 2025

Paradip Port is an artificial port located near the midpoint between Kolkata and Visakhapatnam. It handles primarily Panamax vessels to handle crude, as well as other commodities such as iron ore and thermal coal. The port handled over 150 million tons of cargo in the financial year 2024–25 and is equipped with multiple Single-Point Mooring (SPM) systems that allow large crude carriers to discharge directly into onshore pipelines. Paradip primarily feeds the IOCL Paradip Refinery, a modern 15 million tons-per-year complex located just inland, which relies on the port for crude imports and product evacuation. The port is also developing infrastructure to supply Numaligarh Refinery (NRL) in Assam, which is constructing a crude-import terminal and long-distance pipeline linked to Paradip. With expanding liquid-bulk capacity and strategic refinery connections, Paradip remains the energy backbone of India's eastern seaboard.

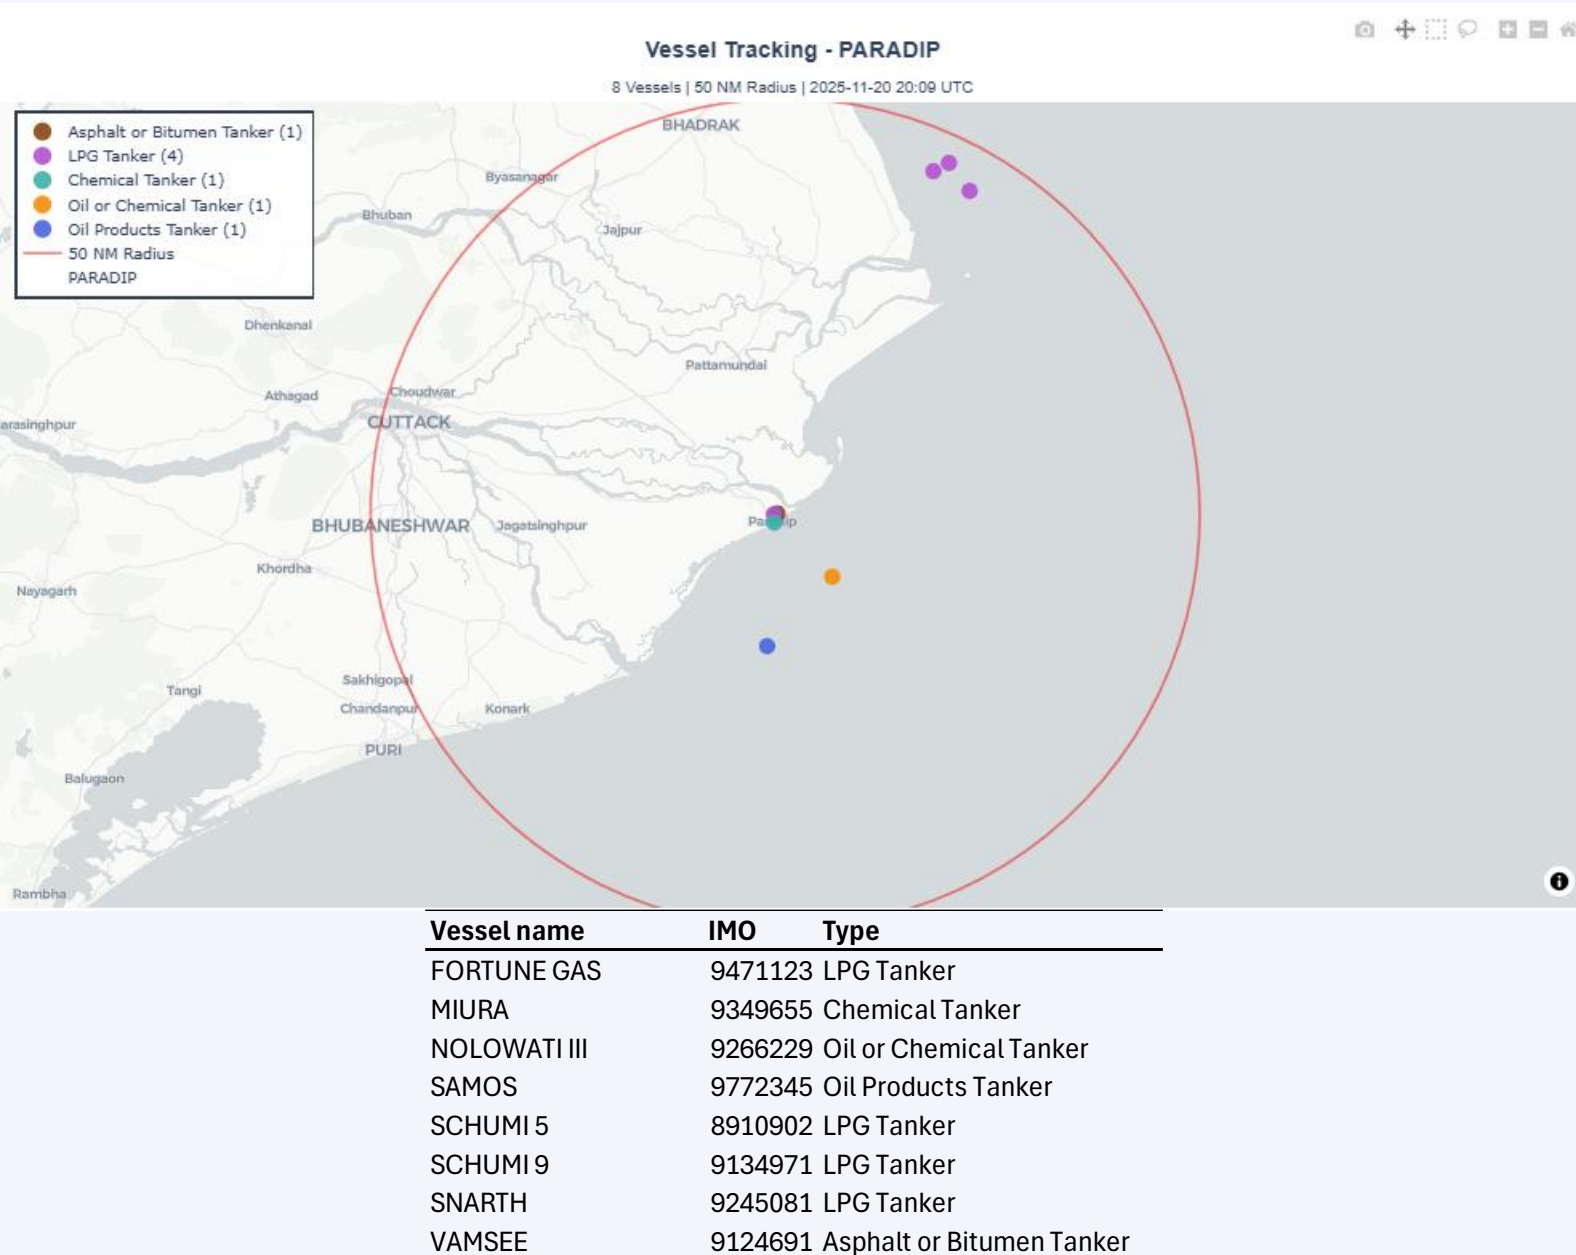

There are 12 vessels within 50 nautical miles of Paradip, up from 8 last week. There are now 3 crude oil tankers in its vicinity, up from 0 last week, plus 2 more LPG tankers.

Paradip 20 November 2025

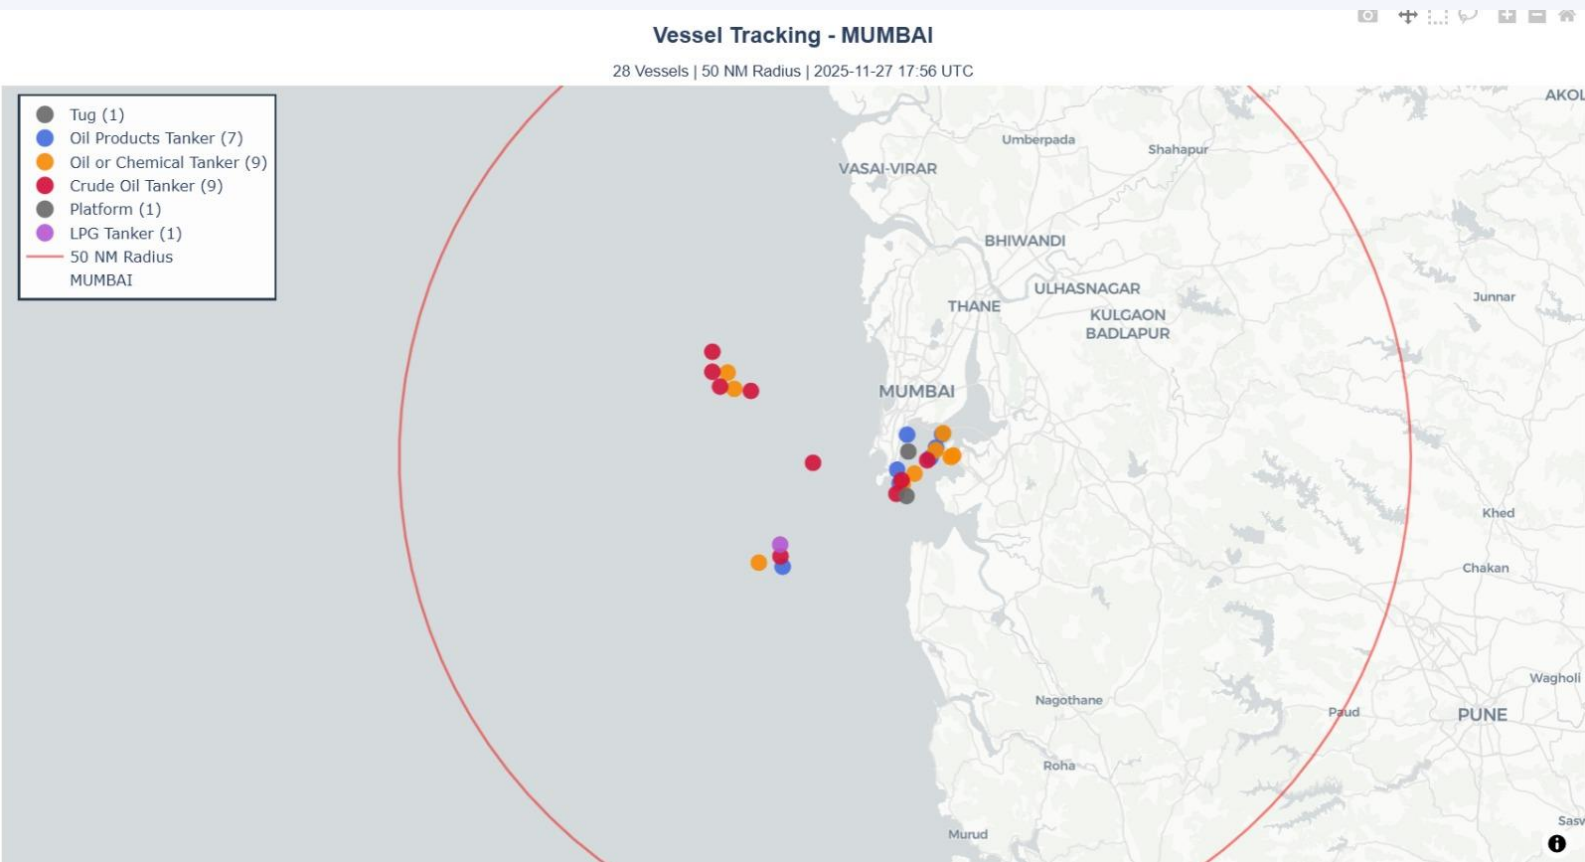

Mumbai 27 November 2025

Mumbai Port, situated on India's west coast, serves as a critical hub for crude oil and petroleum-product flows into the Mumbai metropolitan region and adjacent states. The port's oil terminal on Butcher Island (Jawahar Dweep) handles imports of both crude and refined products; the facility includes dedicated jetties and storage tanks for oil companies. Importantly, on the refining side, Bharat Petroleum Corporation Limited's Mumbai refinery (in Wadala, Mumbai) has a nameplate capacity of almost 7 million tonnes per annum. According to Mumbai Port Authority's revised estimates in 2024-25 FY the crude imports totalled 30.5 million metric tonnes, while it handles 11.8 million metric tonnes worth of petroleum products.

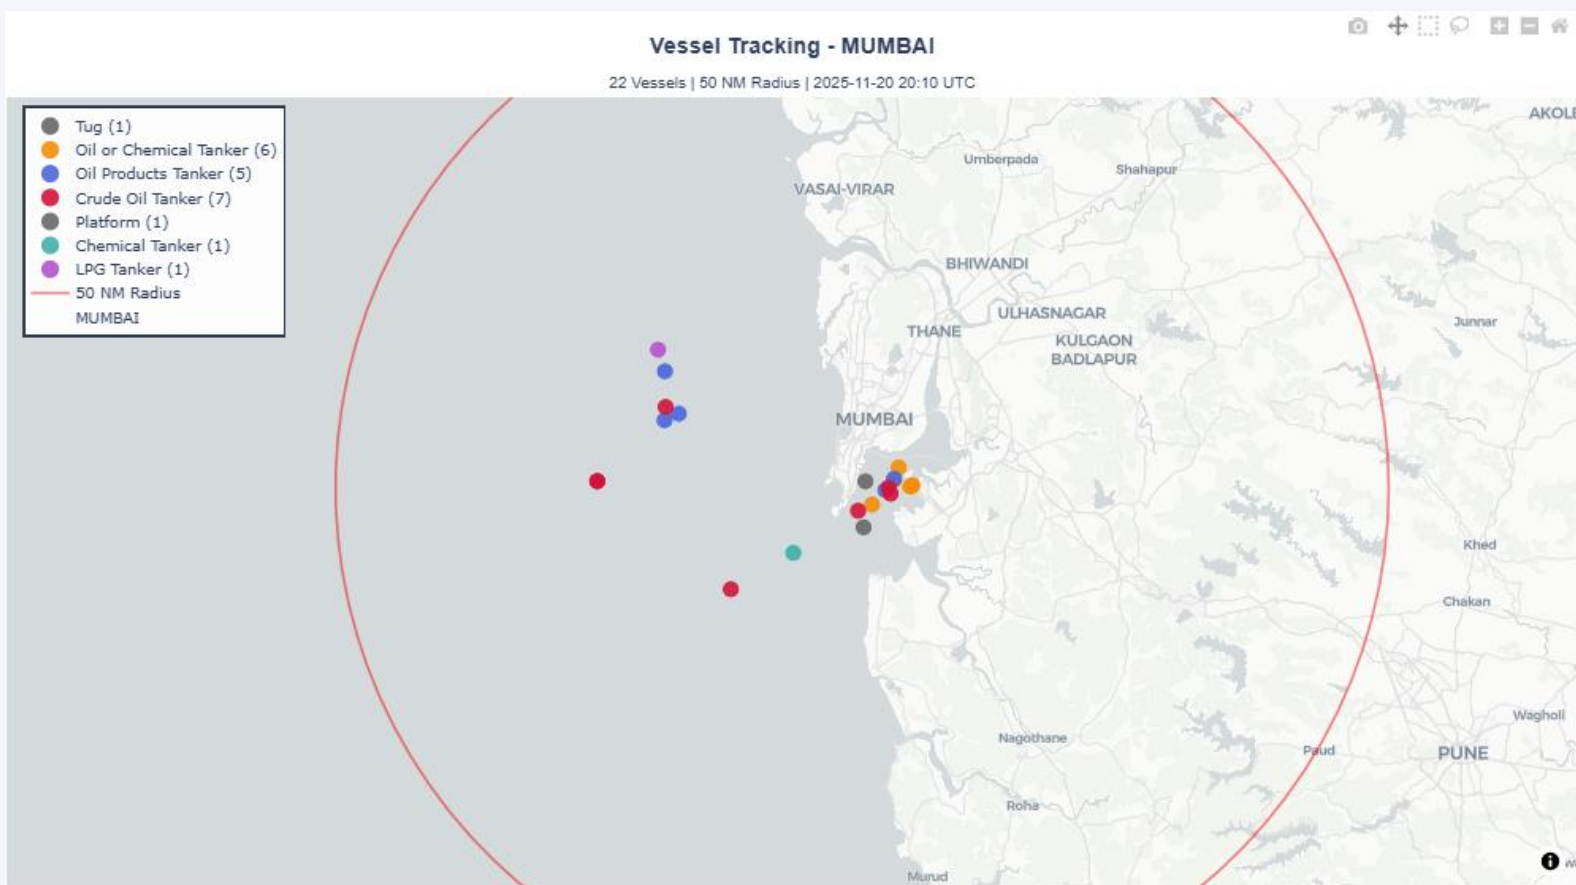

The Peering Eye shows 27 ships (plus one tug ship) near Mumbai, 7 more than last week, with 2 additional crude oil and oil/chemical tankers.

Cochin Anch 27 November 2025

Cochin Port, operated by the Cochin Port Authority, has become one of India's most important oil-handling hubs. In the financial year 2024–25, total cargo throughput reached around 37.75 million tons, supported by strong liquid-bulk performance, which accounted for about 66% of all traffic (≈25.10 million tons). Crude-oil imports dominated the mix at roughly 17.26 million tonnes, while petroleum products contributed around 6.3 million tons, reflecting the port's expanding role in both upstream and downstream energy logistics. A significant portion of Cochin's crude intake feeds BPCL's Kochi Refinery – one of India's largest – via offshore single-point moorings and dedicated pipeline links. The refinery's large-scale operations (15.5 million ton per year capacity) anchor the region's fuel supply, with refined products transported onward through Cochin's road, rail and coastal-shipping connections to markets across southern India.

11 ships are within 50 nautical miles of Cochin Anch. Last week there were 7. The increase is driven by arrival of 6 crude oil tankers.

Visakhapatnam 27 November 2025

Visakhapatnam has quietly become one of India's busiest crude gateways. In May 2024 alone, the port handled 1.43 million tonnes of crude oil across just 13 tankers – an unusually heavy month that underlines how central the port has become to India's east-coast refining system. While, according to the Visakhapatnam Port Authority crude imports exceeded 12.5 mill tonnes in FY 2023-24. Most of this crude flows directly into HPCL's Visakhapatnam refinery, a major complex with refining capacity at 15 mill metric tonnes per year and plans to expand to 18 mill metric tonnes by the next 3-4 years. The port also moves significant volumes of refined products – gasoline, diesel and other distillates – moving into eastern and central India through coastal and inland distribution channels

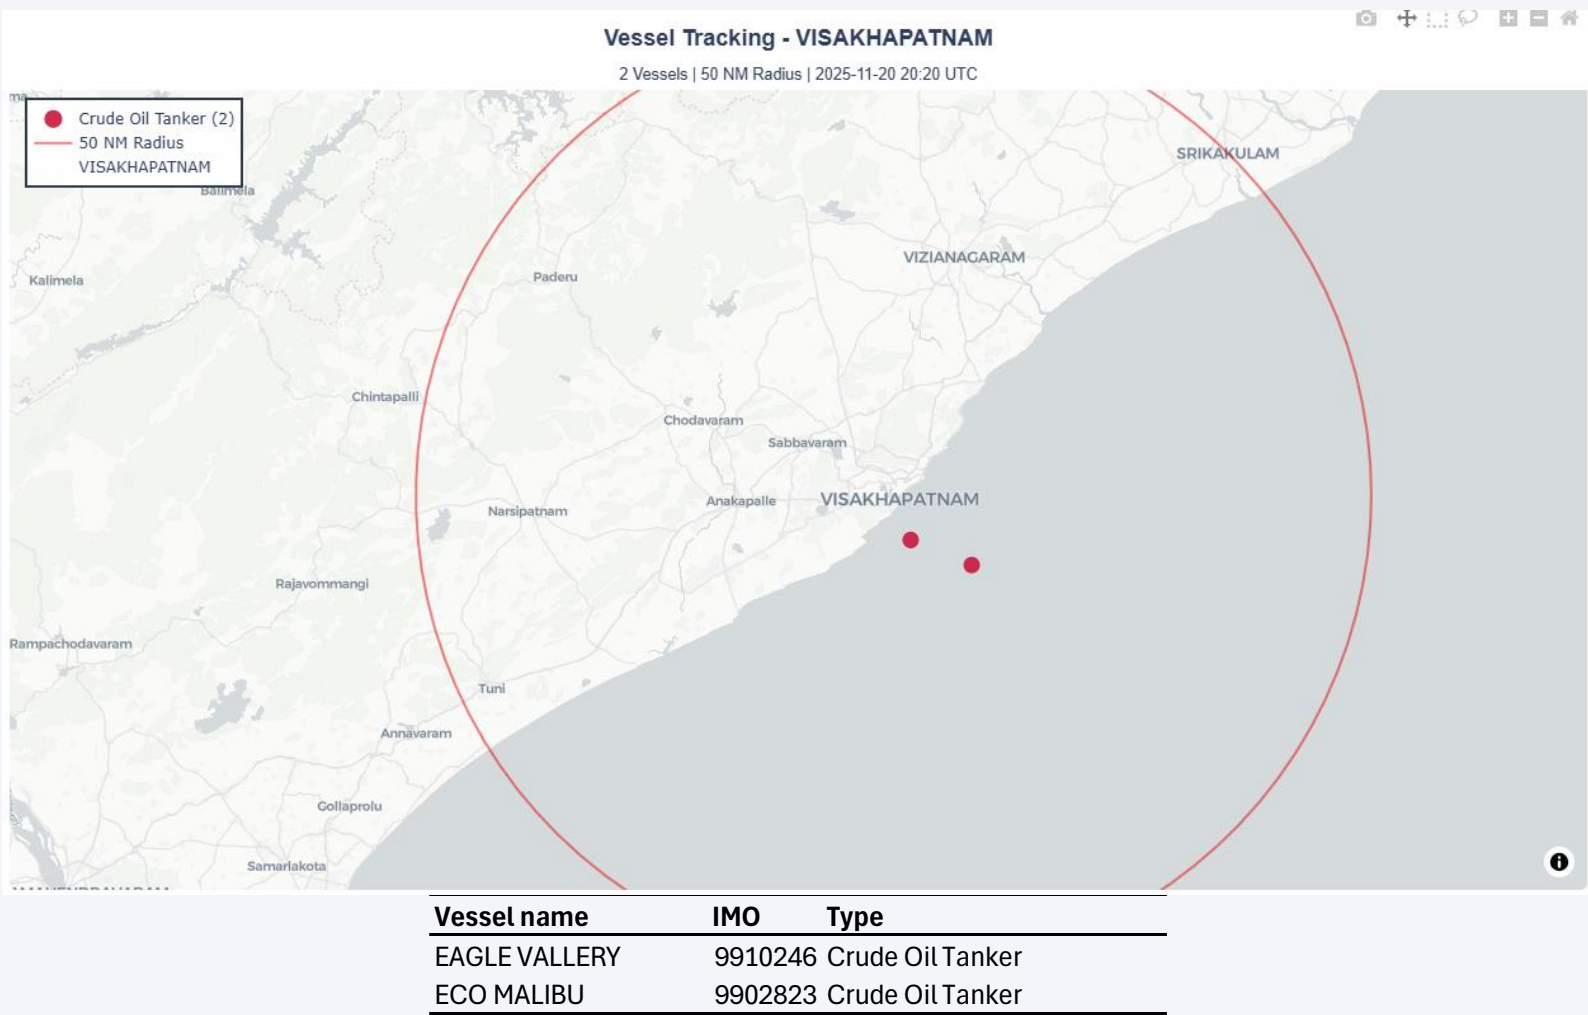

Visakhapatnam Port has 9 ships within 50 nautical miles, up by 9 w/w. The increase is spread across various vessel types.
